

DRIVE SCALE-UP IN EHEALTH SERVICES

Health Village Webinar, October 10, 2019

WEBINAR PRACTICALITIES

Host

- Aki Puustjärvi, Development Manager, Helsinki University Hospital (HUS)
aki.puustjarvi@hus.fi

Interviewee

- Sirpa Arvonen, Project Director, Helsinki University Hospital (HUS)
sirpa.arvonen@hus.fi

Participants

- Please leave your questions and comments by using the Question panel during the webinar. Questions will be answered before the interview and in the end of the presentation.

DIGITALIZATION CHALLENGE

- Hospital IT environment is already cluttered
- New "bleeding edge" solutions are popping up every day
- New workflows are introduced with each new application

THIS IS HEALTH VILLAGE

Health Village is revolutionizing healthcare by providing a global digital, customizable service platform that brings together the best professionals, the latest information and improved digital and local care for patients.

THE KEY VALUE DRIVERS OF HEALTH VILLAGE

Engagement

Services built by clinicians
Patient participate in
development

Quality & Safety

ISO 13485 quality certificate in
product development

Value-based

Patient at the center of care
Care is based on data, not time,
place, situation or individual health
care professionals

Scalability

eHealth services for any
patient group, in any
organization

Efficiency

Health Village platform and
solutions
Standardized processes in
planning and implementation

THE BENEFITS OF SCALE

- Unify processes
- Avoid entropy of the ICT environment
- Create a baseline for digital workflows

HEALTH VILLAGE RECIPE FOR SCALING UP

- Make it generic
 - Use a repeatable and generic development process
 - Use a repeatable and generic set of tools
- Engage
 - Engage professionals
 - Engage patient groups
 - Support professionals and patients
- Make it right the first time
 - Start small and show benefit
 - Get commitment from the hospital management
 - Scale up!

INTERVIEW WITH SIRPA ARVONEN

★ Support for creation and publishing content

★ Modules for quick development

★ Inbuilt tools for research and data

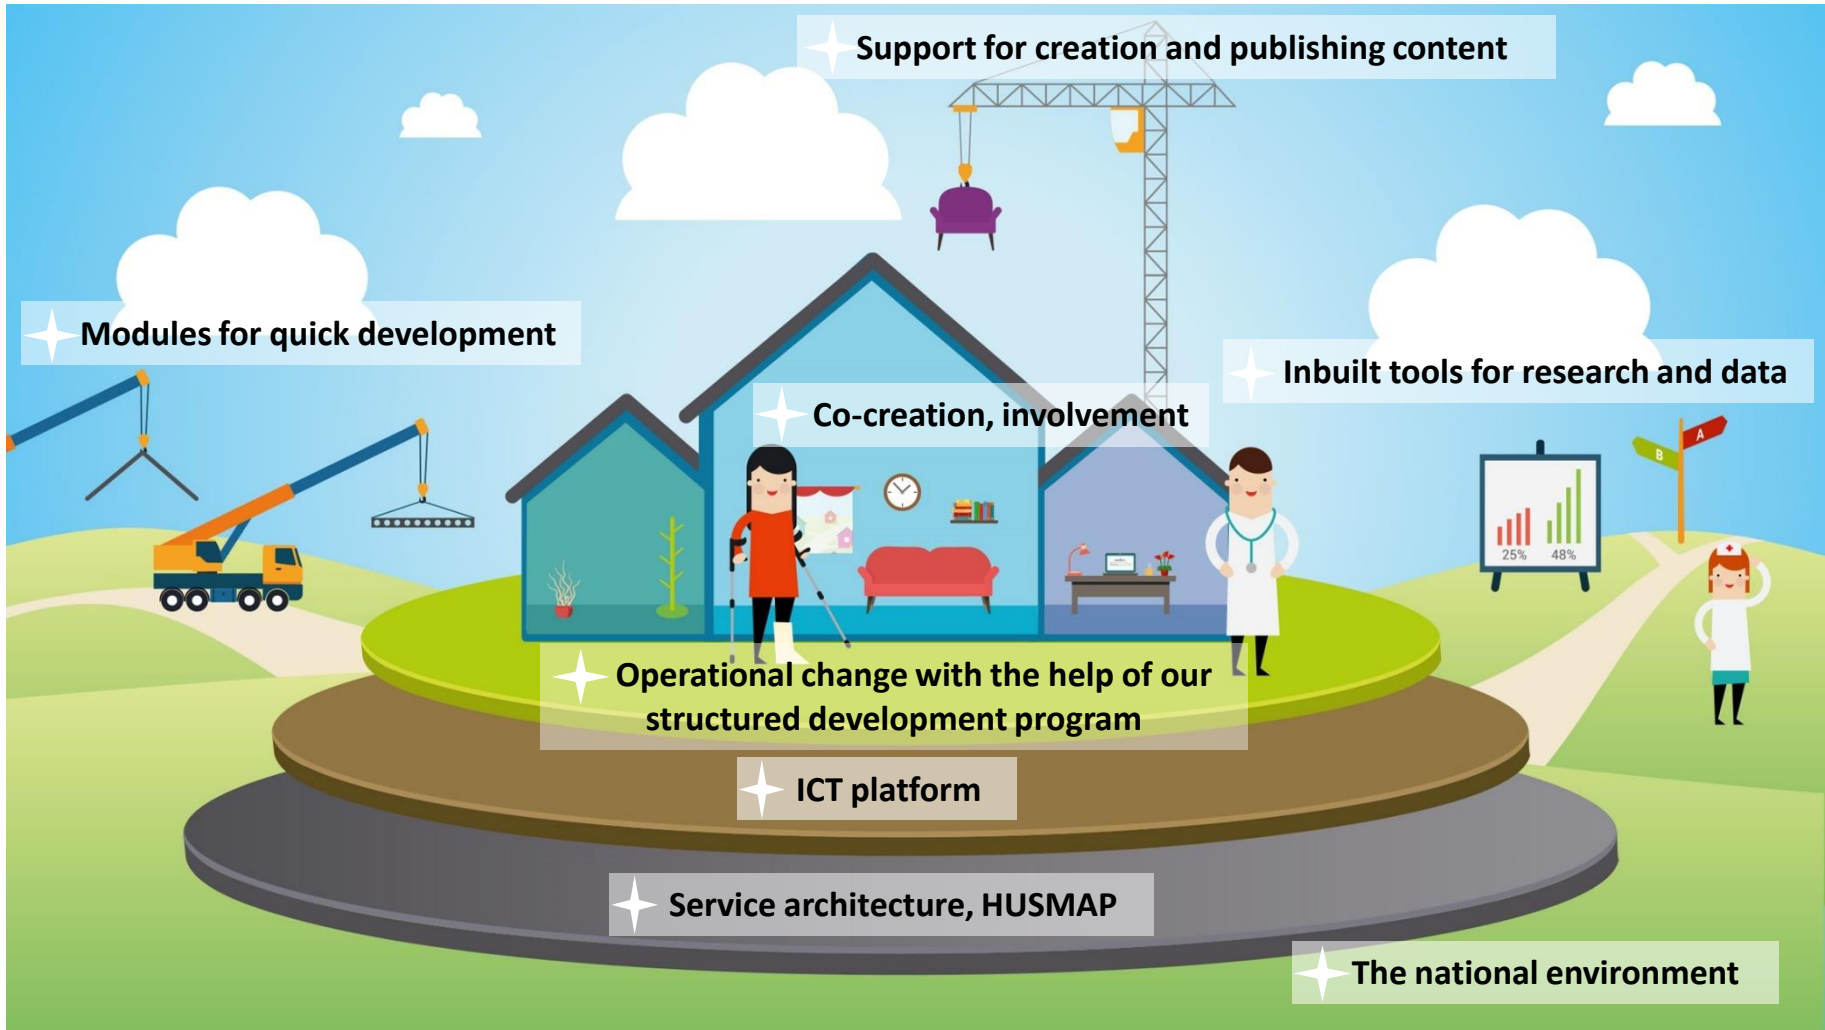

★ Co-creation, involvement

★ Operational change with the help of our structured development program

★ ICT platform

★ Service architecture, HUSMAP

★ The national environment
