

eDia Kids Pump

A UNIQUE AND
RELIABLE DIGITAL
CARE PATHWAY FOR
KIDS' INSULIN PUMP
THERAPY

eDia Kids Pump® is part of Digital Health Village
eHealth services. All digital care pathways
utilize the same IT platform and tools.

eDia Kids Pump – Digital Care Pathway for Starting Insulin Pump Therapy

DIGITAL CARE PATHWAY
IS AVAILABLE 24/7

User follows eDia Kids Pump and contacts professional when needed via the digital care pathway message channel. Professional monitors patient's progress.

- High quality patient education to all users, irrespective of the trainer
- More optimal allocation of professional work input
- Easily updatable patient education material in one place

- Validated tool to support patient care
- Rapid implementation in a ready-to-use and secure IT environment
- Adaptable: suitable for different types of organizations

Digital Health Village® is revolutionizing health and well-being services by digital means. The services are enabled by a custom-made cloud-based IT platform and have been designed and built together with patients, healthcare professionals and patient organizations using the process, tools and templates of the Health Village eHealth Development Program.

The Health Village concept has been developed in cooperation with the Finnish university hospitals. Helsinki University Hospital coordinates the development.
